SALIENT FEATURES OF AUTOMATIC DISINFECTION TUNNEL FOR HUMAN BODY

- Specially manufactured and approved disinfectant is atomized around the human body, while the person moves through the tunnel.
- The atomizers are placed carefully in a manner to superficially cover the person with disinfectant.
- This superficial layer of mist will neutralize any SARS-CoV-2 virus stuck to the body.
- Thus, the disinfection tunnel can be used as a preventive measure to eliminate any contamination on the body of a person.
- The system is designed to operate independently, controlled by a IP65 Rated sensor. As the person walks through the tunnel the atomizers activate to cover the body with a fine layer of disinfectant, without wetting the person.
- Our system is one of the very few approved by Dubai Municipality Health & Safety Division.
- Our Atomizers are specially designed to atomize disinfectant without changing any chemical composition of the disinfectant.

PARTS

Collection & Drain Tray

MULTI HEAD NOZZLE

NOZZLE

CONTROL PANEL

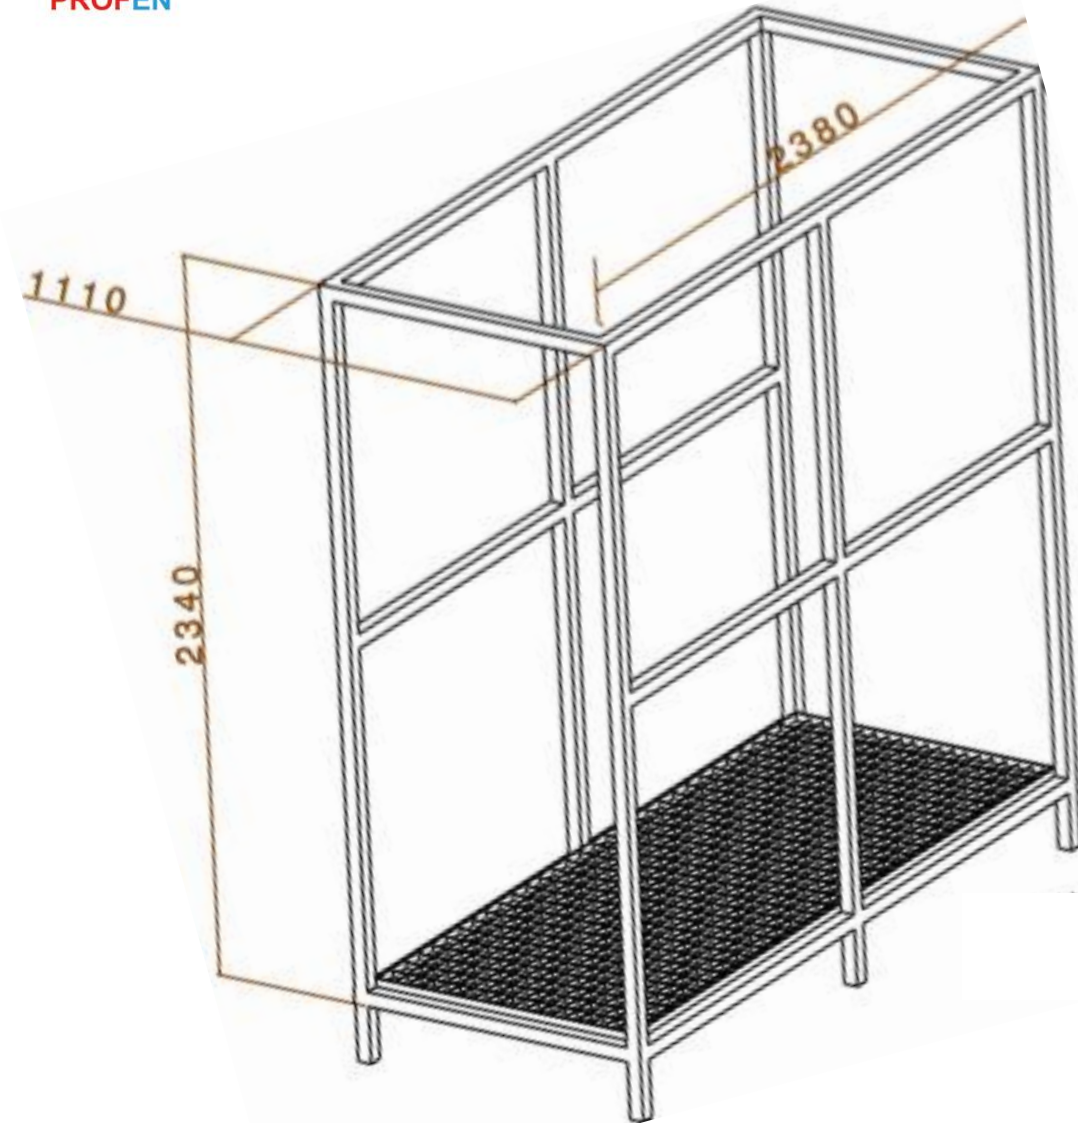

SPECIAL PIPE FOR CHEMICAL ATOMIZATION

ANTI SKID RUBBER MAT

Sr. No.	EQUIPMENT	SPECIFICATION
1	Tunnel shape Human disinfectant	Rectangular
2	Enclosure	Transparent plastic cover with aluminum structure
3	High pressure Pump	misting pump 50-100Bar (0-3LPM)
4	Electric control panel	To control the system
5	Tank	300 Gallon tank
6	Water Consumption	0.5 litre per Minute
7	Power option	220 VAC, 32A /generator operated
8	Sensor for human	Reflective sensor
9	Warranty	12 months from the date of installation
10	Preventive maintenance	Quarterly during the warranty period
11	Structure Dimension	234cm Height , 110cm Width, 238cm Length

- WE ALSO MAKE CUSTOMIZED SANITIZATION TUNNELS
- WE HAVE DIFFERENT MODELS FOR CARS, BUSSES & TRUCKS.
